

Ten Reasons to Choose Miele Commercial

<http://www.jtmservice.co.uk/miele-commercial-laundry/>

Miele commercial washing machines have been designed specifically to provide exceptional performance in a commercial setting.

Here are 10 reasons to choose a Miele commercial washing machine

Miele have been in designing appliances for over 100 years and have always been innovative using the latest technology to deliver exceptional wash result in a range of settings from hotels, to care homes to the NHS.

1. Exceptional build quality and design, Miele are committed to developing machines that are the best in their class and continue to innovate and develop new products on a regular basis
2. Tested and designed to last up to 20 years, providing a good return on investment
3. Use honeycomb drum technology which gives a gentle wash action, providing a cushion of water between the drum and the items being washed, preventing pilling and snagging
4. Have a good range of drum sizes which can cope with load capacities from 5kg to 32kg, so no matter what type and volume of items you need to wash there will be a Miele machines to meet your requirements.
5. Fully electronic programmable PROFITRONIC controls settings so you can wash your items at a temperature, rinse and spin speed to suit your needs
6. Automatic load control that adjusts the hot and cold water consumption to give optimum wash performance
7. High spin speeds so that drying time are reduced
8. Drum lighting so that you can see easily inside the drum, helping to ensure that the machine is not overloaded.
9. Thermal disinfection programmes available for care home and NHS environments or where disinfection of fabrics is required.
10. Compatible tumble dryers that can be stacked on top to maximise space available and also match load sizes.
