

Commercial Tumble Dryers

Whatever type of commercial or industrial tumble dryer you need, you will find it at JTM Service.

Commercial Tumble Dryer

Whether you want to dry small or large loads, need to stack your tumble dryers to save space or need to make sure that your laundry dries quickly, we have a great range of commercial dryers to meet your needs.

Leading Manufacturers

We work with all the leading manufacturers of commercial Tumble dryers, such as Miele, Girbau and Hubsch.

We have a great range of vented dryers for rooms with access to outside ventilation as well as condenser dryers which can be used in rooms without any access to an outside wall. In addition, we can also supply gas heated dryers which are energy efficient and can reduce running costs compared to electric models.

Why Use a Commercial Tumble Dryer?

- Built for frequent, long term use
- Load sizes from 6.5kg to 30kg to allow for efficient washing of larger load and materials
- Great range of drying programmes with different drying stages for different fabric types
- Energy efficient sensitive drying programmes to reduce drying costs
- Can be stacked on top of washing machines to save space
- Adjustable reversing cycles and pauses for more delicate fabrics
- Adjustable final cool down phases to minimise ironing
- Countdown displays to show how much moisture is remaining and time to drying completion so you know when they drying will be completed
